### Modifications:

The body (main portion of the soap saver) can be increased or decreased in increments of 2. The edging is stitched in multiples of 6. Keep in mind that a change made on the foundation chain counts as an increase of 2 since each chain is crocheted on both sides.

## About Soap Savers

In the craft world, we use the term soap saver to refer to little crocheted and knitted sachets (mini bags with draw strings). They are designed to hold whole bars or the remnant pieces of soap that are often pesky or impossible to use. Sachets made from hemp will be rougher and give a deeper exfoliating scrub. We recommend using a cotton/synthetic blend. This tends to create more suds than 100% cotton.

## Soap Saver: Filet with Crown Edge

Simple meets elegant with this beautiful soap saver. The simple filet design allows the soap to breathe. The crowning edge with twisted cord gives it a touch of class. This project crochets quickly making it a perfect last minute gift.
